Technology Director / 2021 - Present / Remote

- Collaborate with the development team to construct web applications and digital experiences, engaging in daily code writing and review to maintain a continuous connection with the day-to-day production process.

- Institute and uphold processes and best practices pertaining to technical implementation across various environments (local, staging, and client servers, version control, etc.) and technologies (frameworks, content management systems, CDNs etc.).

- Investigate emerging technologies and oversee their implementation within the team, offering comprehensive training plans and standards to foster in-house expertise.

- Provide guidance to Operations on incorporating development workflows, estimation processes, and procedures into broader agency expansion efforts.

- Direct involvement in every technical project from its initiation to completion and beyond.

- Manage the allocation of development resources by assigning developers to projects according to their strengths and skill sets.

Lead Developer / 2020 - 2021 / Remote

- Showcase expertise in developing visually captivating and cutting-edge web apps.

- Spearhead and oversee the internal development team, demonstrating leadership in driving project improvements, scalability, and innovation.

- Proactively identify opportunities for enhancement, formulate strategic plans, and optimize project scalability.

- Strategically plan and anticipate staffing requirements in alignment with project demands and schedules.

- Collaborate with cross-functional leadership teams to strategically plan, coordinate, and execute projects and processes.
